The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status							
1)⊠	Responsive to communication(s) filed on 06 N	lav 2003 .					
2a)□		s action is non-final.					
3)□	☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is						
closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213. Disposition of Claims							
4)	Claim(s) $\underline{1-6}$ is/are pending in the application.						
	4a) Of the above claim(s) is/are withdraw	n from consideration.					
5)□	Claim(s) is/are allowed.						
6)[Claim(s) <u>1-6</u> is/are rejected.						
7)	Claim(s) is/are objected to.						
8) Claim(s) are subject to restriction and/or election requirement.							
Application Papers							
9) The specification is objected to by the Examiner.							
10) ☐ The drawing(s) filed on is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.							
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).							
11) The proposed drawing correction filed on is: a) approved b) disapproved by the Examiner.							
If approved, corrected drawings are required in reply to this Office action.							
12) The oath or declaration is objected to by the Examiner.							
Priority under 35 U.S.C. §§ 119 and 120							
13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).							
	1. Certified copies of the priority documents						
	2. Certified copies of the priority documents	• •	,				
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received. 							
14)□ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).							
a) ☐ The translation of the foreign language provisional application has been received. 15)☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims1-6 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "IPA flow time" is indefinite as to what is intended. The term appears to be incomplete as intending to refer to the time in which a particular volume passes or permeates through the permeate, as defined in the specification.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yen et al (5,032,274). Yen et al discloses a membrane made from perfluorinated thermoplastic material, the membrane having a microporous structure with an increased IPA flow rate as function of IPA bubble pressure, the membrane Bubble point is disclosed as including values of 15 psi, 19 psi, 59 and 65 psi (abstract, column 6, lines 1-7, column 7, first paragraph, and column 8, lines 1-10, and 64, column 9, line 14). Yen et al also teach modifying the pore size of the membrane by stretching to obtain

Application/Control Number: 09/890,109

Art Unit: 1723

larger pore size (column 5, last paragraph). Yen fails to disclose the IPA flow time of less than the time claimed in claims 1, 3-4. From the Bubble point of the membrane of Yen et al, one skilled in the art at the time the invention was made can expect flow time for a particular volume of permeate fluid, for the same membrane area within the claimed level. The membrane as disclosed has Bubble points within the disclosed levels (applicant's specification, page 26, table 2). Regarding to the membrane being skinless on at least one surface, and the membrane as asymmetric, as claimed in claim 2, Yen et al teach the membrane as asymmetric, and the method of producing the membrane with a skin or tight surface (column 3, lines 10-14, column 5, lines 6-13, and 48-56). As to claims 5-6, the membrane materials are disclosed (column 4, lines 1-39).
